E Cat Kotor 9.5/15

Go Green

Monte Marine Yachting

www.yachtmm.com

E Cat Kotor 9.5 i **E Cat 15** su katamarani na električni pogon predviđeni za prevoz putnika. Katamarani mogu ploviti 10 sati dnevno i omogućavaju plovidbu u totalnoj tišini, a sa solarnim panelima domet ovoga broda je skoro neograničen. To su brodovi koji štite i ne zagađuju okolinu, stabilni su, pouzdani i laki za održavanje i korišćenje.

Pogodni su za korišćenje na rijekama, jezerima, kanalima, u zalivima... Dva trupa, karakteristična za katamarane, čine ove brodove veoma stabilnim. Dizajnirani su i sagrađeni da budu laki za manevarisanje a najefikasniji su pri brzini od 6 čvorova. Dok plove, ovi brodovi ne prave pramčani talas a bočni talas je minimalan zbog elegantne vodene linije kao kod jedrilica, što omogućava minimalni mogući otpor.

E Cat 9.5 može prevesti do 15 putnika, dok **E Cat 15** prevozi do 50 putnika koji će cijeniti uživanje u predivnom pogledu i izuzetnoj tišini vožnje.

E Cat 9.5 and **E Cat 15** are solar powered catamarans designed for passenger transport. They allow smooth and quiet boating experience and can navigate up to 10 hours per day (without solar panels). Solar panels, however, provide each boat with almost unlimited range. In addition to being non-polluting, silent, environmentally friendly boats, **E Cat 9.5** and **E Cat 15** are also stable, reliable, easy to use and easy to maintain boats.

E Cat 9.5 and **E Cat 15** catamarans are appropriate choice for rivers, lakes, canals, bays... Two hulls, characteristic of all catamarans, make these boats very stable. They are designed and built to be maneuverable and most efficient at 6mph. Each boat does not produce forward waves, and only minimal side waves, due to its elegant water lines designed, like sailboat's, to provide minimum possible resistance.

E Cat 9.5 can accommodate up to 15 passengers, and **E Cat 15** can accommodate up to 50 passengers, all of whom can appreciate beautiful view and an exceptionally quiet drive.
